[Conference Programme](#)

Second Scholasticism

A section devoted to historically oriented papers bearing upon Renaissance and Baroque scholastic thought (relationships to medieval scholasticism, early-modern philosophy or analytical philosophy not excluded).

Analytical Metaphysics

A section designed for papers attempting to bring late-scholastic ideas up to date using the approach and methods of analytical philosophy; while papers deriving from medieval scholasticism (for example, in the vein of analytical Thomism), or systematic lectures on analytical metaphysics are also welcome.

Christian Apologetics

A section devoted to the apologetic of Christian worldview, or a vindication of the philosophical prerequisites of Christian faith, with a special aim at a critical evaluation of the various ways in which the continental post-scholastic philosophical tradition has adversely affected Christian, especially Catholic, orthodoxy.

Confirmed speakers

- John Haldane (online)

- Jacob Schmutz
- Gyula Klima
- Michael Gorman
- Ulrich G. Leinsle
- Paul Richard Blum
